

Flipped Classroom Activity on Moral & Ethical Value (2021-2022)

In a flipped classroom students engage with lectures or other materials outside of class to prepare for an active learning experience in the classroom. This Flipped Classroom activity develops confidence among the students and others communication skills, debate skills. By keeping in mind current situation of the society and culture of the society, Department of Mathematics, Rajarshree Shahu Science College, Chandur Rly was organized this Flipped Classroom activity on Moral & Ethical Values on Dated: 31st July 2021. In this activity college principal Dr. S. S. Thakare and Head of the department Dr. R. V. Kene and Assistant Professor Ms M. S. Palaspagar were also presented for this activity. In this activity students said that a Morals are the rules which people use to guide their behavior and thinking when an individual is dealing with, or capable of distinguishing between right or wrong. Moral values are relative values that protect life and are respectful of the dual life values of self and others. The great moral values, such as truth, freedom, honesty, fairness, kindness, politeness, respect, virtues, perseverance, integrity, to know about one's duties, charity, compassion, etc. have one thing in common when they are functioning correctly, they are life protecting or life enhancing for all. But they are still relative values. Our relative moral values must be constantly examined to make sure that they are always performing their life protecting mission. Hereafter comes ethics of a person. Ethics are moral values in action, a person who knows the difference between right and wrong and chooses right as moral. A person whose morality is reflected in his willingness to do the right thing-even if it hard or dangerous is ethical. Morality protects life and is respectful of others – all others. It is a lifestyle that is consistent with mankind's universal values. All the students of B.Sc.II PCM CMP were actively participated in this activity.
